Listing: London Stock Exchange  
Website: [www.rtwfunds.com/rtw-biotech-opportunities-ltd](http://www.rtwfunds.com/rtw-biotech-opportunities-ltd)  
Telephone number for more information: +1-646-593-7998  
Date of production of this document: 31 December 2024  
Competent Authority: The FCA

You are about to purchase a product that is not simple and may be difficult to understand.

### WHAT IS THE PRODUCT?

**Type:** The Company was incorporated as a Delaware limited liability corporation on 16 February 2017. The Company subsequently redomiciled to Guernsey on 2 October 2019 and is now a non-cellular closed-ended investment company limited by shares with registration number 66847. The Company does not have a fixed life. The Company is an alternative investment fund or "AIF" for the purpose of the AIFM Directive and is externally managed by RTW Investments, LP (the "Investment Manager"), its AIFM. On 30 October 2019, the issued Ordinary Shares of the Company were listed, and admitted to trading on the Specialist Fund Segment of the London Stock Exchange. The Company transferred to the Main Market of the London Stock Exchange on 6 August 2021. The Company changed its name from RTW Venture Fund Limited to RTW Biotech Opportunities Ltd effective 22 June 2023.

**Objectives:** The Company seeks to achieve positive absolute performance and superior long-term capital appreciation, with a focus on forming, building, and supporting world-class life sciences, biopharmaceutical and medical technology companies ("LifeSci Companies"). It intends to create a diversified portfolio of investments across a range of businesses, each pursuing the development of superior pharmacological or medical therapeutic assets to enhance the quality of life and/or extend patient life.

**Intended retail investor:** Ordinary Shares are suitable for all investors who have a long-term (at least five years) investment horizon, the ability to bear capital losses, and at least basic market knowledge and experience. The Company may not be suitable for investors who are concerned about short-term volatility and performance, who are seeking a regular source of income, or who may be investing for less than five years. The Company does not offer capital protection.

### WHAT ARE THE RISKS AND WHAT COULD I GET IN RETURN?

Risk  
Indicator

The risk indicator assumes you keep the Product for 5 years. The actual risk can vary significantly if you redeem at an early stage, and you may get back less.

The summary risk indicator is a guide to the level of risk of the Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the market or because we are not able to pay you. We have classified this Product as 6 out of 7, which is the second highest risk class. This rates the potential losses from future performance at a high level, and poor market conditions will very likely impact our capacity to pay you. This Product does not include any protection from future market performance so you could lose some or all of your investment. If we are not able to pay what is owed, you could lose your entire investment.

---

## Performance Information

---

The main factor that will affect the performance of the Company's shares is the ability of the Investment Manager to identify, build, support and invest in innovative biotech and medtech companies, focused on the development of superior pharmacological or medical therapeutic assets.

To assess the long-term performance characteristics of the Fund, we have backfilled the Company's total return history with the total returns of the NASDAQ Biotechnology index (NBI). This equity index reflects the Fund's diversified portfolio of LifeSci investments and the Company's geographic exposure to the United States of 69%, as of 31 October 2024. The representative performance proxy has a daily price history dating back to 1 January 1999.

The volatility of the Company's share price will vary. Since trading began in October 2019, the Company's shares have had an annualised volatility of 30.7%. Over rolling five-year periods from 1999, the proxy had an average volatility of 30.1%, however, during periods of stress, the volatility temporarily rose to 62.4%. These volatility figures are higher than the broader equity markets and so returns are likely to fluctuate more than wider global equity benchmarks. For reference, over the same period, the S&P 500 had an average rolling five-year volatility of 19.5% which temporarily rose to 49.8% during periods of stress.

### What could affect my return positively?

Specific factors that affect returns positively would be risk-adjusted superior asset selection of the underlying LifeSci portfolio with value creating programs that would become transformative therapies. Another factor which would impact returns is liquidity events such as IPOs for private portfolio companies or acquisitions of private or public portfolio companies. A broad factor that would contribute to positive returns would be overall positive trading conditions for the life science and medical sectors in the global markets. In addition, broader improvements in the valuation of developed equity markets are likely to improve valuations of the Company, too. We would expect to see stronger correlation between the Company's valuation and the markets during larger market movements. Since inception, the Company's most favourable performance over a one-year period was 113.7%, between March 2020 and March 2021. Using the longer performance history available from the proxy, the proxy experienced the most favourable five-year rolling shareholder total return of 39.4% per annum between July 2010 and July 2015.

### What could affect my return negatively?

Specific factors that affect returns negatively would be poor performance and risk management of underlying life science investments; poor liquidity management in the private equity holdings; the underlying investments failing to develop new technologies in the biopharmaceutical and medical technology sector, and the investments failing to develop research into commercially viable business opportunities. Falling valuations of the equity markets, particularly in the biotech and medical sectors would be expected to correlate to lower valuations of the Company's investments. The Company's most unfavourable one-year shareholder return was -46.9%, which occurred between July 2021 and to July 2022. Over longer periods the proxy had a least favourable five-year rolling return of -15.7% per year, between March 2000 and March 2005.

### What could happen in severely adverse market conditions?

The Company lost 60.7% of its shareholder value in the period both leading up to and during the global market sell-off due to the Covid-19 outbreak, from March 2021 to July 2022, when the Biotech sector peaked and subsequently corrected. In addition, during the dot-com market crash, the proxy experienced a loss of 74.7% between March 2000 and July 2002. Under severely adverse market conditions in the biotech and medtech sectors, the value of Product may fall proportionately. There is a risk that the capital value of an investment in the Company's shares could reduce significantly, potentially down to zero.

## WHAT HAPPENS IF THE COMPANY IS UNABLE TO PAY OUT?

As a shareholder of the Company, you will not be entitled to compensation from the Financial Services Compensation Scheme or any other compensation scheme in the event that the Company were unable to pay any dividends or other returns it may elect to pay from time to time, or if it were unable to pay amounts due to you on a winding-up. No guaranteed scheme applies to an investment in the Company.

## WHAT ARE THE COSTS?

The Company is aware of the Financial Conduct Authority's Statement on forbearance in relation to investment trust disclosure requirements dated 19 September 2024. The Reduction in Yield (RIY) shows what the impact the total costs you pay may have on your investment return. The total costs take into account one-off, ongoing and incidental costs. The amounts shown here are the cumulative costs of the product itself, for three different holding periods. They include potential early exit penalties. The figures assume you invest \$10,000. The figures are estimates and may change in the future.

When purchasing Ordinary Shares in the Company, as with any shares in listed companies, the only additional costs you may incur are broker commissions, platform fees, advisory fees, and/or stamp duty. As a publicly listed entity, the Company's operating costs are transparently disclosed in its audited Annual Report, Interim Report, and Financial Statements. Additionally, the Association of Investment Companies (AIC) recommends that investment trusts report an Ongoing Charges Figure (OCF). This figure, calculated annually as a percentage of the average net assets, provides insight into the regular operational expenses of the Company, excluding transaction costs, borrowing costs, market changes, or performance-related fees. For the year ending 31 December 2024, the annualised OCF was 1.75%. **For the avoidance of doubt, the ongoing costs and transaction costs are not additional costs paid by shareholders to the Company. The Company's published net asset value is net of all costs/fees incurred by the Company and/or within the underlying investment portfolio.**

### Investment of \$10,000

Scenarios	if you cash in after 1 year	if you cash in after 3 years	if you cash in after 5 years
Total Costs	0 USD	0 USD	0 USD
Reduction in Yield (RIY) per year	0.00 %	0.00 %	0.00 %

### Composition of Costs

The table shows the impact of each year of the different types of costs on the investment return that you might get at the end of the recommended holding period.

#### This table shows the impact on return per year over 1 year

One-off costs	Entry costs	0.00 %	No entry costs are payable to the Company when you purchase shares, although you may have to pay your broker fees or commissions.
	Exit costs	0.00 %	No exit costs are payable to the Company when you sell your shares, although you may have to pay your broker fees or commissions.
Ongoing costs	Portfolio transaction costs	0.00 %	No portfolio transaction costs are payable by you to the Company. The Company directly incurs these costs as set out in the Annual Report.
	Other ongoing costs	0.00 %	Management fees, finance expenses and operating expenses are not payable by you to the Company. The Company incurs these fees and expenses directly, as set out in the Annual Report.
Incidental costs	Performance fees	0.00 %	Performance fees are not payable by you to the Company. These fees are incurred directly if the Product achieves the 8% return hurdle (with catchup).
	Carried interests	0.00 %	The Company does not pay carried interest.

#### HOW LONG SHOULD I HOLD IT AND CAN I TAKE MONEY OUT EARLY?

**Recommended holding period: 5 years.**

This period is specified for the purposes of this document only and reflects that ordinary shares in the Company are a long-term product. This product has no required minimum holding period. Investors can sell their investment on the London Stock Exchange on any day which is a dealing day on the London Stock Exchange. The Company is not obliged to acquire any of the Company's shares. No fees or penalties are payable to the Company on sale of your investment, but you may be required to pay fees or commissions to any person arranging the sale on your behalf.

#### HOW CAN I COMPLAIN?

If you have any complaints about the product or conduct of the product manufacturer, you may lodge your complaint with the Company's investment manager, on +1-646-343-9280. This information is also available on the Company's website at <https://www.rtwfunds.com/rtw-biotech-opportunities-ltd>. If you have a complaint about a person who is advising on, or selling, the product you should pursue that complaint with the relevant person in the first instance.

#### OTHER RELEVANT INFORMATION

Further documentation, including the Company's annual and semi-annual reports and regulatory disclosures, is available on the Company's website at <https://www.rtwfunds.com/rtw-biotech-opportunities-ltd>. This documentation is made available in accordance with the Disclosure Guidance and Transparency Rules of the United Kingdom Financial Conduct Authority, the Alternative Investment Fund Managers Directive (2011/61/EU).
